# **SECTION 1E: LOAN FEATURES**

### **Loan Features Selection**

In order to complete this section, brokers must consider all answers previously given, and in particular, those relating to:

- Loan Purpose (Section 1A);
- Refinance & Debt Consolidation (if applicable) (Section 1B);
- Possible adverse changes to financial situation (Section 1C);
- Repayment at Retirement (Section 1D).

Each feature in the table is to be marked as 'Important', 'Not Important' or 'Don't Want', depending on the broker's discussion with the applicant(s).

'Important' means the feature is a high priority for the applicant(s). 'Not Important' means it is not of high priority to the applicant(s). 'Don't Want' should be selected where the applicant(s) expressly do not want the feature.

Where a feature is identified as 'Not Important' or 'Don't Want', no further action is required for the purposes of this table.

Where a feature is identified as 'Important', the broker must ascertain from the applicant(s) why that feature is important to them. Please select the appropriate reasons in the 'Reason' column for any feature that is marked 'Important'. In selecting the reasons, the broker should ensure the applicant(s) consider the particular benefit(s) of the feature that is/are important to them (e.g. if fixed rate period is important a reason may be because the applicants want certainty of the repayment amount during the fixed rate period).

Where the feature has been selected for reasons other than for reasons already provided, ensure details of those 'Other' reasons are captured in the same column.

Where a feature is identified as 'Important', confirm the applicant(s) understands each of the risks contained in the 'Features' column by ticking the relevant box alongside that risk.

Feature	Important	Reason	Not Important	Don't Want
1. Rate Type				
Fixed rate				
Rate is fixed for a specified term giving certainty of interest and repayments for that term.  Ensure each applicant understands each of the following risks:  Rate is fixed at a point in time and applicant(s) will not benefit from subsequent market interest rate reductions during fixed rate period.  Rate may change between the time of approval and the time of drawdown if rate lock has not been obtained.  Limited or no ability to make additional repayments while the interest rate is fixed.  May not have the ability to redraw.  Possibility of expensive break/economic costs if, during the fixed interest rate period, applicant(s):  Repay loan in full;  Switch to another product or loan type;  Make additional repayments over and above any prescribed limit;  Sell the property; or  Seek further funds.	☐ If feature is marked 'Important', confirm that each of the risks listed in 'Features' been explained to the applicant(s):  AND ☐ indicate the preferred duration of the fixed rate period: ☐ 1 year ☐ 2 years ☐ 3 years ☐ 4 years ☐ 5 years	Where fixed rate is important, why is this?  Certainty of repayments.  Make budgeting easier.  Other.  Details for "Other":		
Variable rate				
Interest charged and repayments will change to reflect interest rate movements.  Ensure each applicant understands the following risk:  Interest rate and repayment amount may increase while the loan is on a variable rate.	If feature is marked 'Important', confirm that each of the risks listed in 'Features' have been explained to the applicant(s):	Where variable rate is important, why is this?  To take advantage of potential future decreases in the interest rate.  Flexibility with respect to repayment, redraw and/or early repayment of loan.  Other.  Details for "Other":		

Feature	Important	Reason	Not Important	Don't Want
1. Rate Type				
Fixed and Variable rate				
The applicant(s) may want a loan split into fixed and variable portions.  Fixed rate portion Rate is fixed for a specified term giving certainty of interest and repayments for the fixed rate portion.  Variable rate portion Interest charged and repayments will change to reflect interest rate movements for the variable rate portion.  Ensure each applicant understands each of the following risks associated with fixed and variable splits of the loan:  • Applicant(s) will not obtain the full benefit of rate decreases and will still have some exposure to the risk of rate increases.  • Applicant(s) will generally not be able to change the ratio of the fixed and variable portions.  • Applicant(s) will be required to make separate repayments for each portion.  • Fixed rate may change between the time of approval and the time of drawdown if rate lock has not been obtained.  • Limited or no flexibility in relation to the fixed rate portion concerning making additional repayments and redraws during the fixed rate period.  • Possibility of expensive break/economic costs in relation to the fixed rate portion if during the fixed rate period, the applicant(s):  - Repay loan in full;  - Switch to another product or loan type;  - Make additional repayments over and above any prescribed limit;  - Sell the property; or  - Seek further funds.	☐ If feature is marked 'Important', confirm that each of the risks listed in 'Features' have been explained to the applicant(s):  AND ☐ indicate the preferred duration of the fixed rate period: ☐ 1 year ☐ 2 years ☐ 3 years ☐ 4 years ☐ 5 years	Where fixed and variable rate is important, why is this?  Limiting risk of increasing variable interest rate to obtain some benefit from potential future decreases in the interest rate.  Retaining a degree of flexibility in relation to increased repayments, redraws and/or early repayment of part of the loan.  Make budgeting easier than if the entire loan were variable.  Other.  Details for "Other":		
2. Repayment Type				
Principal and Interest				
<ul> <li>Repayments cover loan principal and interest so that the loan is repaid in full by the end of the loan term.</li> <li>Applicant(s) could pay less interest over the life of the loan when compared to a loan which features a period of interest only repayments.</li> <li>Interest rates on principal and interest repayments are generally lower than interest only.</li> </ul>	If feature is marked important, indicate preferred repayment frequency:  weekly fortnightly monthly	Where principal and interest is important, why is this?  Minimise interest paid over life of loan.  Higher lending limit.  Lower deposit required.  Build up equity from the start.  Other.  Details for "Other":		

Feature	Important	Reason	Not Important	Don't Want
2. Repayment Type				
Interest Only				
Allows smaller payments during the interest only period enabling:  • Higher cash on hand for other purposes.  • Flexibility to manage cash flow.  • Smaller initial payments on investment home loans may serve a tax purpose. Has the applicant(s) sought tax advice?  Ensure each applicant understands each of the following risks:  • Higher interest rates may apply to interest only loans.  • Interest only payments will not reduce the loan principal.  • Not repaying loan principal will result in the applicant paying more interest over the loan term.  • After the end of the interest only period, principal and interest repayments will be required and these will be higher than they would have been if the loan had principal and interest repayments throughout the loan term.  • The amount of equity that is built-up in the property securing the loan will be less with an interest only loan.	☐ If feature is marked 'Important', confirm that each of the risks listed in 'Features' have been explained to the applicant(s):  AND ☐ indicate the preferred duration of the interest only period: ☐ up to 1 year ☐ 1 to 3 years ☐ 3 to 5 years ☐ 5 years plus	Where interest only is important, why is this?  Accommodate temporary reduction in income (e.g. parental leave, changing circumstances).  Accommodate anticipated non-recurring expense item (e.g. education, renovation/construction, furniture).  Variable and unpredictable income.  Recommendation provided by an independent financial advisor/accountant.  Taxation or accounting reasons (no tax advice is being given), including:  Release funds for investment purposes (e.g. shares, investment property, super contributions)  Priority is paying off non-deductable debts (this loan is for investment purposes)  Plan to convert to an investment property in future  Other.  Details for "Other":		
3. Product Type				
Redraw				
Allows applicant(s) to access extra repayments that they made over and above the required minimum repayments.  Ensure each applicant understands each of the following risks:  • Automatic right to redraw unless request to cancel  • Each redraw may be subject to the lender's discretion.	If feature is marked 'Important', confirm that each of the risks listed in 'Features' have been explained to the applicant(s):	Where having a redraw feature is important, why is this?  Flexibility to access prepaid funds if needed.  Other.  Details for "Other":		

4.	Conflicts between loan features
4.1	Are there any conflicts between any of the loan features marked 'Important' in Section 1E: Loan Features
Yes	No No
If Y	es:
4.2	Explain the conflicts to the applicant(s) and ask them to consider the priority of the loan features they identify as 'Important' so that the conflict can be resolved. Once this is done, set out those priorities and reasons for those priorities below.
5.	Other
5.1	Do the applicant(s) have any other requirements and objectives not already stated which may affect whether the loan, for which they propose to apply, is suitable, including whether there are any particular personal circumstances of the applicant(s) not documented in any previous responses in this interview guide that are relevant to the loan features that have been identified as 'Important'?
6.	Product Selection
Pro	duct selection needs to take place having regard to the outcome of the requirements and objectives' enquiries set out above. The broker must give a concise rative summary of the applicant(s) requirements and objectives and why the particular type of loan product was chosen to meet those requirements and objectives.
